

In The Arms of Rock and Roll

Out of nowhere time's hand fell on me Out of nowhere Out of nowhere
And since it hit I just can't wait to be Starting over Starting over
Out of nowhere to light this flame Things are never gonna be the same
This is where we both belong Playing loud and playing strong
We may lose our self control In the arms of Rock and Roll
Almost thought that I had lost my way Going nowhere Going nowhere
But this is my love and its here to stay Crossing over Crossing over
Going nowhere without you girl So let's go it's a great big world
That Im claiming in this song Singing loud and singing strong
As we lose our self control In the arms of Rock and Roll In the arms of Rock and Roll
Going nowhere without you girl So let's go it's a great big world
That Im claiming in this song Singing loud and singing strong
As we lose our self control In the arms of Rock and Roll In the arms of Rock and Roll
This is where we both belong Playing loud and playing strong
As we lose our self control In the arms of Rock and Roll In the arms of Rock and Roll

Round and Round

Here we are on this merry go round Turn and turn and groove to the sound
We know sound was there from the start And can still be found right here in my heart
Round and Round and Round and Round and Round and Round and Round and Round and Round

Round and Round and Round and Round and Round and Round and Round and Round and Round

The show begins and the lights come alive Turn it up and kick into drive

We can play and sing through the night The time is now and everything is alright

Round and Round and Round and Round and Round and Round and Round and Round

Round and Round and Round and Round and Round and Round and Round and Round and Round

In the center time stands still but You can still hear bells ring

This is how we all get our thrill So we sing as we all go

In the center time stands still but You can still hear bells ring

This is how we all get our thrill So we sing as we all go

Round and Round and Round and Round and Round and Round and Round and Round

Round and Round and Round and Round and Round and Round and Round and Round and

Round Round and Round Round Round and Round Round Round and Round

Round Round and Round Round Round and Round Round Round and Round

Runaway

Sweet temptation your looking fine I want to take you and make you mine

Feel the pulsing all around You've been lost but now you're found now you're found

I can make you the brightest star I can take you but you're a Runaway

A Runaway a Runaway a Runaway

Come on baby come with me You'll see places you'd never see

No one can hurt you not anymore that's what love is what love is for love is for

I can make you the brightest star I can take you but you're a Runaway

A Runaway a Runaway a Runaway

Runaway Runaway Runaway Runaway Runaway

Love Has Found A Way

Hard to find Hard to keep What you sow You will reap

Empty arms Broken heart Empty bottle tearing me apart

This is love Sad to say So elusive and it slips away

Some get lost Some get found Some just keep on spinning round and round

It took forever but it came somehow Nice to have it in the here and now

Today Love has found a way Today Love has found a way

Today Love has found a way Today Love has found a way

No more sorrow No more fear Little cupid found his way right here

Over mountains and the sea His bow and arrow shot a hole through me

It took forever but it came somehow Nice to have it in the here and now

Today Love has found a way Today Love has found a way

Today Love has found a way Today Love has found a way

It took forever but it came somehow Nice to have it in the here and now

Today Love has found a way Today Love has found a way

Today Love has found a way Today Love has found a way

Come on Out And Play

Would you come on out and play today If I call your name hey Ray come play
We can go and laugh the time away I say And stay out until the end of day and we may
This is how I grew up This is where we got tough Come on out and play today today
We'd be out as long as we can see And come home dark and dirty were we
But those days are gone and oh so long ago We can never get them back ya know I know
This is how I grew up This is where we got tough Come on out and play today today
We can play all day under the sun and we were'nt the only ones
Kids would come from everywhere Just to play in open air
Underneath the great blue sky With the time just passing by Hey Raymond
We can play all day under the sun and we were'nt the only ones
Kids would come from everywhere Just to play in open air
Underneath the great blue sky With the time just passing by Hey Raymond
This is how I grew up This is where we got tough Come on out and play today today
Today Today Today Today

Journey's End

All that we do to survive All here that keeps us alive
Living as one Under the sun Waiting on fate to arrive
All that we use everyday So much that we throw away
We rise and we fall Together as all Through the grace of natures way
When there's no snow in Colorado Or any rain upon the plain

There'll be a storm taking form To wash away and start again
Never did we realize The journey is always the prize
So simple so true But more than we knew racing to face our demise
When there's no snow in Colorado Or any rain upon the plain
There'll be a storm taking form To wash away and start again
So you see We can be All together once again
So say a prayer And prepare As we come to journey's end
When there's no snow in Colorado Or any rain upon the plain
There'll be a storm taking form To wash away and start again
To wash away and start again

Follow Your Heart

I hold on And so we too We hold on together
And we will sing And sing we do Could go on forever
If we offend It's with good will We're only here To show our skill
If you wish to join us And you will You'll have to come closer
Closer and closer Closer still Become the composer
Through all your life You've played your part
You're free now to Follow your heart
Through all your life You've played your part
You're free now to Follow your heart

The Worlds A Stage

Here but a walking shadow It would seem
Through the world As the world In a dream
That's what dreams are for Fill the page
As a metaphor The worlds a stage
Reach as high as you can go To touch the flame
Never know when you may fall Just the same
Such things dreams are made on Said the sage
As a metaphor The worlds a stage
Into mere oblivion The unseen
The story line it ends and then Fade the seen
Oh what dreams may come Beyond age
As a metaphor The worlds a stage

Make It Happen

I think this is taking too much time Running out of even words to ryme
I've achieved much more than zero sum Switched it out before it had begun

We can make it happen Lets go make it happen now
We can make it happen We can make it happen now
I found fortune and my destiny And I was ready when it came to me
I am feeling that the time is right To pass the torch to those who'll fight the fight
We can make it happen Lets go make it happen now
We can make it happen We can make it happen now
We can make it happen Lets go make it happen now
We can make it happen We can make it happen now
Make it happen now Make it happen now

Open Windows

Hardly worth it to pack and go Hardly worth it now to stay
Passing by the open windows That I find along the way
I became all that I can be When it came to what I cared
And believe from what I can see It' still needed everywhere
Everything that we believed we knew Has brought all that's gonna change
And then when all things get strange You'll try to rearrange But you'll have lost your way
Everything that we believed we knew Has brought all that's gonna change
And then when all things get strange You'll try to rearrange But you'll have lost your way

In The Night

It may be wrong It may be right But we're out on the street tonight

Some things here In the air Going around now it's everywhere

Think of this as your invite We are gonna set this town alight

In the air tonight

Come on out If you please Far too long we've been on our knees

We are strong We are true We're coming to a town near you

Think of this as your invite We are gonna set this town alight

In the air tonight Tonight

There are just too many Ways to go Which is best I just don't know

As we make our way on Through the night It will come to us

When we're on the street tonight Tonight

Think of this as your invite We are gonna set this town alight

In the air tonight Tonight Tonight Tonight Tonight

Double Trouble

Was a time One would do Now I find I need two

It can be Quite a mess But it sure is Happiness

Come on baby Shed your skin Move in close Let's begin

Shake it baby Do it right Bring some heaven Here tonight

Yea it feels Oh so fine I'll recover Over time

Come on baby Shed your skin Move in close Let's begin

Double Trouble Here with me Blow and bubbles Gotta hold on me

Double Trouble Here with me Blow and bubbles Gotta hold on me

Double Trouble Here with me Blow and bubbles Gotta hold on me
